JOB EVALUATION

- INTRODUCTION
- MERITS AND DEMERITS
- PROCESS
- METHODS

- 
- The background of the slide is a light gray gradient, decorated with numerous realistic water droplets of various sizes. Some droplets are large and prominent, while others are small and subtle, scattered across the top and bottom edges of the slide.
- A **job evaluation** is a systematic way of determining the value/worth of a job in relation to other jobs in an organization.
 - It tries to make a systematic comparison between jobs to assess their relative worth for the purpose of establishing a rational pay structure.

The background of the slide is a light gray gradient, decorated with numerous realistic water droplets of various sizes. Some droplets are large and prominent, while others are small and subtle. They are scattered across the slide, with a higher concentration in the top-left and bottom-right corners.

FEATURES OF J/E

- Standards of J/E are relative, not absolute.
- Tries to access jobs, not people.
- Basis of J/E is Job Analysis.
- Carried on by groups, not individuals.

The background of the slide is a light gray gradient, decorated with numerous realistic water droplets of various sizes. Some droplets are large and prominent, while others are small and scattered. They have highlights and shadows, giving them a three-dimensional appearance.

MERITS OF J/E

- **Harmonious relationship between employees and manager.**
- **Standardization**
- **Relevance of new jobs**
- **Specialization**
- **Helps in selection of employees**

The background of the slide is a light gray gradient, decorated with numerous realistic water droplets of various sizes. Some droplets are at the top, some at the bottom, and some are clustered together. They have highlights and shadows, giving them a three-dimensional appearance.

DEMERITS OF J/E

- Problem of adjustment
- Unrealistic
- Organisational Limitations
- Opposition by workers
- Subjective

JOB EVALUATION HELPS FOLLOWING PURPOSES:

- ❖ IT HELPS IN DEVISING AN ACCEPTABLE WAGE.
- ❖ IT HELPS IN THE PROPER PLACEMENT OF WORKERS IN JOB.
- ❖ IT HELPS THE PERSONNEL DEPARTMENT TO RECRUIT THE RIGHT PERSON FOR A JOB SINCE REQUIREMENT OF EACH JOB ARE CLEARLY INDICATED.
- ❖ IT HELPS IN FORMULATING THE INTERNAL TRAINING PLAN.
- ❖ IT HELPS TO AVOID WAGE AND OTHER DISCRIMINATION FOR SIMILAR JOBS IN SAME ORGANISATION OR A GROUP OF ORGANISATIONS UNDER THE SAME MANAGEMENT.

The background of the slide is a light gray gradient, decorated with numerous realistic water droplets of various sizes. Some droplets are large and prominent, while others are small and scattered. They are positioned around the text, with some near the top left and others near the bottom right.

METHODS OF J/E

- Qualitative Method
 - Ranking or Job Comparison
 - Grading or Job Classification
- Quantitative Method
 - Point Rating
 - Factor Comparison

1. RANKING METHOD

- Simplest form
- Each job as a whole is compared with other and this comparison of jobs goes on until all the jobs have been evaluated and ranked.
- All jobs are ranked in the order of their importance from the simplest to the hardest or from the highest to the lowest.

EXAMPLE :

TABLE 11-2 Job Ranking at Jackson Hospital

Ranking Order	Annual Pay Scale
1. Office manager	\$43,000
2. Chief nurse	42,500
3. Bookkeeper	34,000
4. Nurse	32,500
5. Cook	31,000
6. Nurse's aide	28,500
7. Orderly	25,500

Note: After ranking, it becomes possible to slot additional jobs (based on overall job difficulty, for instance) between those already ranked and to assign each an appropriate wage rate.

2. GRADING METHOD

- Also known as classification method
- A job grade is defined as a group of different jobs of similar difficulty or requiring similar skills to perform them.
- Job grades are determined on the basis of information derived from job analysis.
- The grades or classes are created by identifying some common denominator such as skills, knowledge and responsibilities.

EXAMPLE :

Class	Rank	Employees
Class1	Executives	Office manager, Deputy office manager, Office superintendent etc.
Class2	Skilled Workers	Purchasing Assistant, Cashier, Receipts clerk etc.
Class3	Semiskilled workers	Stenotypists, Machine-operators etc.
Class4	Less skilled workers	Daftaris, File clerks, Office boys etc.

3. POINT RATING

- Jobs are broke down based on various identifiable factors such as skill, effort, training, knowledge, hazards, responsibility, etc. Thereafter, points are allocated to each of these factors.
- Weights are given to factors depending on their importance to perform the job.
- The sum of points gives an index of the relative significance of the jobs that are rated.

EXAMPLE :

Job Evaluation : Point Method

- Example – Characteristics of Point Job Evaluation method, Factors, Scaled Degrees, Weights -

Weights	Compensable Factors	Degrees				
(3)	(1)	(2)				
40%	Skills Required	1	2	3	4	5
30%	Effort Required	1	2	3	4	5
20%	Responsibility	1	2	3	4	5
10%	Working Conditions	1	2	3	4	5

Here in this example, a Job 'X's **240** total points may result from:

- **2 degrees** of skills required = **2 X 40** = 80
- **3 degrees** of effort required = **3 X 30** = 90
- **3 degrees** of responsibility required = **3 X 20** = 60
- **1 degree** of working conditions = **1 X 10** = 10

• **TOTAL** = **240**

4. FACTOR COMPARISON

- Instead of ranking complete jobs, each job is ranked according to a series of factors. These factors include mental effort, skill needed, responsibility, working conditions, etc.
- Pay will be assigned in this method by comparing the weights of factors required for each job.
- Wages are assigned to the job in comparison to its ranking on each job factor.

EXAMPLE :

An example of how the Factor Comparison Method works is given below ::

Factors/ Key Job	Daily Wage Rate	Physical Effort	Mental Effort	Skill	Responsibility	Working Conditions
Electrician	60	11(3)	14(1)	15(1)	12(1)	8(2)
Fitter	50	14(1)	10(2)	9(2)	8(2)	9(1)
Welder	40	12(2)	7(3)	8(3)	7(3)	6(3)
Cleaner	30	9(4)	6(4)	4(5)	6(4)	5(4)
Labourer	25	8(5)	4(5)	6(4)	3(5)	4(5)

Process of Job Evaluation

GAINING ACCEPTANCE

- ❖ TOP MANAGEMENT MUST EXPLAIN THE AIM AND USES OF THE PROGRAMME TO THE EMPLOYEES AND UNIONS

ORAL
PRESENTATION

CREATING JOB EVALUATION COMMITTEE

As it is not possible
for a single person
to evaluate all key
jobs

FINDING THE JOB TO BE EVALUATED

EVERY JOB NEED NOT BE EVALUATED. THIS MAY BE TOO TAXING AND COSTLY. CERTAIN KEY JOBS IN EACH DEPARTMENT MAY BE IDENTIFIED. WHILE PICKING UP THE JOB CARE MUST BE TAKEN TO ENSURE THAT THEY REPRESENT THE TYPE OF WORK PERFORMED IN THAT DEPARTMENT.....

ANALYSING AND PREPARING JOB DESCRIPTION

THIS REQUIRES THE PREPARATION OF A JOB DESCRIPTION
AND ALSO AN ANALYSIS OF A JOB THAT NEEDS FOR
SUCCESSFUL PERFORMANCE....

A JOB DESCRIPTION SUMMARIZES THE DUTIES OF A POSITION
AND STATES THE ESSENTIAL RESPONSIBILITIES.....

JOB DESCRIPTION

1. What is the overall purpose of the job ?

2. What are the main tasks of the job?

3. What qualifications are required?

4. What are the key competencies?

BENEFITS OF JOB DESCRIPTION

SELECTING THE METHOD OF EVALUATION

FOUR METHODS OF JOB EVALUATION

THE MOST IMPORTANT METHOD OF EVALUATING THE JOBS MUST BE IDENTIFIED NOW, KEEPING THE JOB FACTORS AS WELL AS ORGANISATIONAL DEMANDS IN MIND

EXAMPLE OF SELECTING EVALUATION METHOD

Point ranking method of job evaluation

The Rating Scale ...

CLASSIFYING JOBS

THE RELATIVE WORTH OF VARIOUS JOBS IN AN ORGANISATION MAY BE FOUND OUT AFTER ARRANGING JOBS IN ORDER OF IMPORTANCE USING CRITERIA SUCH AS:

- 5 Skill Requirements
- 5 Experience Needed
- 3 Condition Under Job Performed
- 3 Type Of Responsibility To Be Shouldered
- 4 Degree Of Supervision Needed
- 5 Amount Of Stress Caused By Job

Weights can be assigned to each such factor. When we finally add all the weights, the worth of a job is determined. The point may then be converted into monetary ones.

REVIEWING PERIODICALLY

- ❖ IN THE LIGHT OF CHANGES IN THE ENVIRONMENTAL CONDITIONS(TECHNOLOGY,PRODUCTS,SERVICES,ETC.) JOBS NEED TO BE EXAMINED CLOSELY.
- ❖ THE TRADITIONAL CLERICAL FUNCTIONS HAVE UNDERGONE A RAPID CHANGE IN THE SECTORS LIKE BANKING,INSURANCE,AND RAILWAYS,AFTER COUMPUTERISATION.
- ❖ NEW JOB DESCRIPTION NEED TO BE WRITTEN AND THE SKILLS NEEDS OF NEW JOBS NEED TO BE DULY INCORPORATED IN THE EVALUATION PROCESS.
- ❖ EMPLOYEES MAY FEEL THAT ALL THE RELEVANT JOB FACTORS–BASED ON WHICH THEIR PAY HAS BEEN DETERMINED–HAVE NOT BEEN EVALUATED PROPERLY.

NEED FOR JOB EVALUATION

MERIT RATING:

Objectives of Merit Rating:

- ✗ People differ in abilities and aptitudes. Management should know these differences so that employees are assigned jobs according to their capability.

Main objectives of merit rating are as follows:

- ✗ 1. To assess the work of employees in relation to their job requirements.
- ✗ 2. To consider employees/workers for promotions, transfer, layoffs etc.
- ✗ 3. To assess the good and bad points in working of employees and then making suggestions for improvement.
- ✗ 4. To help in wage and salary administrations and taking decisions about incentives and increments to be given to the workers.

MERIT RATING:

- ✘ 5. To evaluate skill and training capabilities of employees and helping in planning suitable training and development programmes for workers.
- ✘ 6. To know the problems faced by workers while doing various jobs.
- ✘ 7. To provide a basis for comparison to segregate efficient and inefficient workers.
- ✘ 8. To help management in placement/transfer to workers according to their capacity, interest, aptitude and qualifications.
- ✘ 9. To help supervisors to know their subordinates more closely for increasing their efficiency and improving productivity.

MERIT RATING

Job evaluation evaluates the job and the merit rating assess the worth of a person performing the job.

- ✘ Merit rating is also called the performance appraisal. It evaluates, controls and reviews the performance. Both job evaluation and performance appraisal are aimed at systematically determining the wage rates paid to the employees.

Benefits of Merit Rating

- ✘ Useful in rewarding the person and the reward can be linked to the performance.
- ✘ Helps to identify the person's potential to perform the assigned jobs and to decide the future positions he can take up.
- ✘ To identify the training needs of the employees.
- ✘ Helps in counselling employees regarding their strengths and weaknesses.
- ✘ It motivates employees to perform better.
- ✘ Acts as a constructive performance appraisal system.

MERIT RATING

Requirements of a sound performance appraisal system:

- ✗ The merit rating system should be transparent in the sense that it should be known to everyone.
- ✗ The criteria should be fixed and known to the rater as well as to the ratee.
- ✗ There should not be any bias or ambiguity.
- ✗ The rating should be done at the prefixed intervals.
- ✗ It should be related to the job related behavior only.
- ✗ It should act as a *basic* for sound reward system.

METHODS OF MERIT RATING

Ranking method:

This is the conventional and easy method. Normally the employees are ranked in the order from best to worst. This is applicable to industries where number of people are few.

The limitation of this method is that it cannot indicate specific strengths and weaknesses. Ranking becomes difficult as the number of employees increase.

METHODS OF MERIT RATING

Paired comparison method:

- + In this method, the rater compares each employee in a group with all the remaining employees.
- + The performance is the only parameter for comparison. This also becomes difficult to compare if the group is large.

Forced choice method: In this method, for each trait or behaviour number of statements' are given and the rater is required to select only one statement which describes the particular behaviour of the employee being evaluated.

This method is called forced choice because the rater is forced to check only one statement and is not allowed to describe behaviour in his own words. This is most popular method used for rating of lower cadre staff.

METHODS OF MERIT RATING

Check list method: These are the lists made up of series of questions or statements which are concerned about the important aspects of employees performance on the job. The process of rating simply consists of checking those questions concerned to ratee and answering the question in "YES" or "NO". It is easy to compare the employees by this method.

Scale plan: This is widely accepted method in industries. The scale is constructed to define the various degrees of the traits.

There are two types of scale plans:

- ✗ **Continuous scale:** Here the scale is constructed to represent the highest to lowest degree of required trait:
 - ✗ (a) Numerical scale, (b) Description scales.
- ✗ **Discontinuous scales:** This is the scale which gives elaborate description of facts needed for rating.
